

Complete Highpointing Statistics

Highpoint Name: Repeat ascents are noted in parentheses. An asterisk indicates a failed attempt. **Elevation:** in feet. **Prominence:** Usually stated as clean prominence. **Gain:** accumulated gain including all drops and regains. **Miles:** round trip. **County:** a red background indicates a county highpoint. **State:** a blue background indicates a state highpoint. **SHP#:** running count of state highpoints. **CHP#:** running count of county highpoints.

County Highpoint Total: 466.

States Completed: (1) Arizona, 6/24/2000; (2) Rhode Island, 7/3/2000; (3) New Mexico, 10/9/2004; (4) Connecticut, 8/8/2006; (5) Nevada, 8/13/2006. I also completed all of Arizona's counties a second time on 12/15/2006.

Prominence Totals

Above 300 feet: 345; **Above 1,000 feet:** 269; **Above 2,000 feet:** 212; **Above 3,000 feet:** 109; **Above 4,000 feet:** 55, **Above 5,000 feet:** 30. Note: Repeated ascents do not add to the totals presented here.

National Park Highpoints: 14 (13 USA, 1 Mexico)

Total Elevation Gain: 645,071 feet (122.17 vertical miles)

Total Miles: 2,377

Comment: I have climbed Camelback Mountain and Piestewa Peak (both located within Phoenix city limits) well over 300 times total over the years. This is a conservative estimate and my truer figure may be over 400 ascents. Had I kept track of my ascents, I would be nearing 1,000,000 vertical feet of elevation gain.
